STEVEN  KRETCHMER

Steven Kretchmer tension settings are fascinating to look at and exciting to wear. These spectacular artisans specialize in metallurgical innovations including the development of 18 karat *blue* gold. Using superior knowledge of metal and gifts for design, Kretchmer produces some of the most stunning jewelry ever seen.

Using a patented process of conditioning the metals through heating and cooling, tension settings suspend the gemstones in what seems like mid-air with up to 12,000 pounds per square inch of pressure. Not only are these pieces extremely beautiful, they are one of the safest settings available.

Steven Kretchmer tension settings can only be found in the Madison, Wisconsin area at TQ Diamonds. Tension settings are available in **beautiful rings**, [bracelets](#) , [pendants](#) and [ear rings](#)

- .
